Problem

❌ **Education costs money and time**

**Many people doesn't have enough time and money for education.**

❌ **Language barrier leads to economic gaps**

If you can speak several languages, you can earn more.

❌ **Current language community can be better**

You can earn rewards according to your contribution.

Architecture

reactjs framework

wallet integration
calls to deployed smart
contracts

Calls to smart contracts
- to retrieve IFPS metadata root
- to initiate tips to teachers

solidity

adds new
metadata/images

reads random images from root
uploads new images with
metadata

IPFS

We store:
- Image Metadata
- Actual images

something that we want to add...

- **DAO**

- **NFTs as a certificate**

- **Proper Integration with IPFS**

- **Better UI**

- **User Profile**

Future

01 Web3 Linkedin feature

As more students emerge, more jobs will come.
People can try their skills.

02 Expanding Category(Programming)

Tech industry has been growing and many types of
jobs are emerging.

03 People's work/study history bank

People can come here to check and bring their
work/study history and utilizing it as a track
record.
